

PUBLIC HEALTH GRAND ROUNDS

Extreme Risk Protection Orders: A New Gun Violence Prevention Tool for Healthcare

Firearm related injuries are the leading cause of death among U.S. youth aged 1-19 years. Extreme Risk Protection Orders (ERPO), known as Red Flag Laws, are a prevention tool that has effectively prevented suicide, mass shootings, including school shootings, and intimate partner homicide. ERPO is a civil court order that temporarily prevents a person at extreme risk of harming themselves or others and who is behaving dangerously from possessing or purchasing firearms. This session will explain ERPOs and the application process.

Friday, December 6
12:00pm – 1:00pm
Zoom Webinar

ASL interpreters have been requested. A good faith effort (up until the time of the webinar) will be made to provide accommodations. Live closed captioning provided.
