# Emergency Medicine Research & Academic News

## Announcements and Congratulations

CONGRATULATIONS to **Mike Kamali** on his recent appointment as Chair of the University of Rochester Medical Center (URMC) Department of Emergency Medicine. Mike has been the acting Chair, and after a 10 month national search, has been appointed by the Board of Trustees. He has been with URMC for over 10 years serving as assistant medical director of the Department of Emergency Medicine, interim medical director and director of quality assurance.

**Dave Adler** was quoted in Reuters Health regarding early cervical screening for HIV-positive women. He encourages women to be screened due to the fact that invasive cervical cancer is more prevalent in women with AIDS, which reflects his ongoing global health research in South Africa.

**Jeff Bazarian** was acknowledged in the Democrat & Chronicle for the NFL Charities grant he was awarded. There will be 10 University of Rochester football players wearing special helmets that will measure variations in white brain matter with the force of impact each player receives that does not incur a concussion. ## Miscellaneous News

### Sandy Schneider, Professor and Emeritus Chair, Begins Sabbatical to Focus on Advancing Emergency Medicine Nationally as ACEP President

As of January 1, 2011 Sandy Schneider has begun a six month sabbatical to focus on her new position as ACEP president. She is currently working with the Director of CMS, Don Berwick, to address patient safety issues and accountable care organizations. In late January, Sandy will be hosting a summit to discuss the future of Emergency Medicine as it relates to our workforce in the next 20 years. Also, she will soon be discussing the potential role emergency medicine will play in health care reform with Assistant Secretary for Preparedness and Response Nick Lurie at the Department of Health and Human Services. ## Emergency Medicine Research & Academic News

### Miscellaneous News (continued)

#### Online Community Engaged Research (CEnR) Launched by UR CTSI

The NIH has been encouraging research that connects clinical investigators with the community. The Center for Community Health and the CTSI Community Engagement Core have developed an online education program to acquaint investigators with the fundamentals of community interacted research. The rudimentary goals are to become adequately immersed in community organizations as well as several population groups that will help analyze questions prudent to the community. Also, to establish efficient procedures in acquiring and retaining participants in research. There will be four components that participants will complete online that are self-paced and informative. This curriculum is worth three CME credits or three CNE credits.

#### Emergency Medicine Research Web Pages Launched

The research pages within the department of emergency medicine website have been redesigned! The new pages highlight the research interests of our faculty, list recent publications, describe the research being conducted in the emergency department and help those that are interested in pursuing research at URM. To take a look at the new pages, visit the URM Emergency Medicine website at <http://www.urmc.rochester.edu/emergency-medicine>

### Publications Click on \* citations for abstract/full text of published articles
