

Are you **7-12 years** old?
Do you like **Virtual Reality**?

Reimbursement

\$18 per hour

\$25 for your parent

Help Us in Understanding **SPEECH** Processing

Understanding Speech Processing may help us develop better **support** and **interventions**.

Participation will include at least two visits (**2-3 hrs** each).

Participants will be asked to complete a **virtual reality** game and listen to words via headphones while we monitor their **brain activity** with electroencephalogram (EEG).

Participants Should:

- be 7-12 years old
- have ADHD, Autism, or neither
- already have a formal diagnosis of ADHD or Autism
- have no history of major head injury or seizures
