

## HPV Reporting Changes:

### Updated Effective Date Now January 8<sup>th</sup>, 2025

Date: January 6<sup>th</sup>, 2025

---

Effective Date: January 8<sup>th</sup>, 2025

Beginning January 8<sup>th</sup>, 2025, HPV results associated with PAP testing (co-testing and reflexed) will also be reported separately. The combined Cytology PAP-HPV reports currently being distributed will continue and will include the HPV result within the PAP report. For those ordering PAP-HPV through UR Medicine's Epic system, eRecord, you will not receive an additional In-Basket message but you will be able to access results separately through the result review fields within the Epic system. For clients who receive hardcopy reports or electronically through the RRHIO, there will now be an additional HPV-only report when ordered in conjunction with PAP testing. These changes are being made to comply with new requirements for the monitoring of HPV testing.

The method for reporting HPV-only test requests (without Cytology) will not change.

For questions or additional information, please contact Nathan Loria at any of the methods listed below.
